OBJECTIVE

To continue to learn and develop into a valuable asset to the team I work on.

TECHNICAL SKILLS

| | | |
|------------------|------------|-----------|
| Java | Spring MVC | Python |
| Microsoft Office | Windows 10 | Hibernate |
| Git | Thymeleaf | MySQL |

PROJECTS

Launchcode Capstone Project, Launchcode, St. Louis, MO, 2018 (in progress) - Building an employee scheduling application that uses the Spring framework. The application employs user authentication. After the employee logs in they will be able to create their availability for the next work week. They can also change their availability before the deadline which is the date that my application will generate a schedule based on all the employee's availability. The employees will be in control of creating the schedule in which management is not involved.
